

Teaching topics : Female genital system

Teaching outline :

A. Normal

1. Embryology
2. Anatomy

B. Pathology

1. Female genital infectious
 - a). Lower female genital infectious
 - b). Upper female genital infectious
2. Vulva
 - a). Non-neoplastic epithelial disorders
 - Lichen sclerosus
 - Lichen simplex chronicus
 - b). Benign Tumors
 - Papillary hidradenoma
 - Condyloma acuminatum
 - c). Premalignant and malignant neoplasms
 - Carcinoma and vulvar intraepithelial enoplasia (VIN)
3. Vagina
 - a). Carcinoma and vaginal intraepithelial enoplasia (VaIN)
 - b). Adenocarcinoma
 - c). Embryonal rhabdomyosarcoma
4. Cervix
 - a). Inflammations
 - b). Encocervical polyps
 - c). Intraepithelial and invasive squamous neoplasia
5. Body of uterus and endometrium
 - a). Normal cycle
 - b). Functional endometrial disorders (DUB)
 - c). Inflammations
 - d). Adeonmyosis
 - e). Endometriosis
 - f). Endometrial polyps
 - g). Endometrial hyperplasia (EIN)
 - h). Malignant tumors of the endometrium
 - i). Tumor with stromal differentiation
 - j). Leiomyomas
 - k). Leiomyosarcomas
6. Fallopian tubes
7. Ovaries
 - a). Non-neoplastic and functional cysts
 - b). Ovarian tumors

- c). Tumor of Müllerian epithelium
 - d). Germ cells tumors
 - e). Sex cord-stromal tumors
8. Gestational and placental disorders
- a). Disorder of early pregnancy
 - b). Disorder of late pregnancy
 - c). Gestational trophoblastic disease
